

# MUSCULO-SKELETAL PHYSIOTHERAPY

AND

SPORTS  
PHYSIOTHERAPY

## OBJECTIVE

*The Department of Musculoskeletal and Sports Physiotherapy strives to provide comprehensive training in evidence-based assessment, proficient clinical decision-making, and effective treatment techniques in the field of orthopedics, musculoskeletal disorders, and sports related injuries.*

## SCOPE

*The focus of the department is on developing evaluation skills and evidence-based diagnoses. Emphasis is placed on the physiotherapist's role in traumatology, orthopedic conditions, pre-op, post-op and preventive orthopedic care. The educational curriculum includes a number of practical classes and experiential learning through patient interaction.*

## **PROGRAMS**

*Our OPD specializes in the treatment and rehabilitation of Acute – chronic musculoskeletal injuries. Additionally, we also offer services to various sports teams, where we conduct movement analysis assessments and provide tailored management strategies.*

*Our department also places strong emphasis on research in emerging areas of musculoskeletal physiotherapy and we pride ourselves on utilizing ● evidence-based clinical pathways, which serves as a notable strength of our department.*
