## EMERGENCY ULTRASOUND – SKILL AND APPLICATION

Organised by:

***Department of Emergency Medicine, SJMCH.***

A course in the use of point-of-care ultrasound (POCUS) in the Emergency Department.

A case-based format with hands-on practice.

# ST. JOHN'S

NATIONAL ACADEMY of HEALTH SCIENCES

## **A warm welcome from the Department of Emergency Medicine**

POCUS is a tool that has drastically changed the way we manage critically ill patients. It improves patient outcome, and physician confidence in their own decision making. It has rapidly become indispensable to the management of patients in the emergency department.

Skill with the ultrasound is undoubtedly crucial, but it is important to be able to pair that skill with clinical acumen on a case-by-case basis.

We are pleased to invite you to this course, which focuses on both these aspects of the application of POCUS. Conducted in a case-based format, the course aims to improve basic skills and then enable you to apply these skills to better manage your patients in the emergency department.

We look forward to your participation.

Regards

Dr. Girish Narayan

Professor and Head,

Dept. of Emergency Medicine,

SJMCH.
