INTRODUCTION

Qualitative research is a type of research that explores and provides deeper insights into real-world problems. It is an enquiry process of understanding a social or human problem, based on building a complex holistic picture formed with words, reporting detailed views of informants, and conducted in a natural setting. In the current scenario, qualitative research has an important place in every field and is becoming increasingly recognized. This workshop aims to improve and to keep up the domain of knowledge with time by providing deeper understanding of qualitative research. The sessions designed will facilitate the participants from different disciplines to appreciate and critically reflect on a variety of methods involved in qualitative research.

GENERAL OBJECTIVE

At the end of the workshop, the participants will be able to conceptualize qualitative research, appreciate its importance and apply this knowledge in conducting research in various settings.

SPECIFIC OBJECTIVES

At the end of the two days workshop, participants will be able to:

- Discuss the different types of qualitative research design.
- Explain the subject recruitment in qualitative research.
- Discuss the ethical considerations in qualitative research.
- Develop skills in conduct of focused group discussion and interview.
- Describe mixed methodology.
- Identify a qualitative research topic.
- Analyze qualitative data.
- Drafting a qualitative research report.
