INTRODUCTION

In today's technology driven era, nursing is ever evolving, and nurses are faced with enormous challenges. The sea of change in global health care requires nurses to keep up with the pace and to address the needs of demanding clients. There is a dire need to innovate & create solutions to problems, navigate through the paths of research and to integrate these findings in evidence-based care. Hence, research becomes a very significant domain in the profession of nursing.

This workshop aims to orient and enhance the knowledge & skills of the aspiring researchers.

GENERAL OBJECTIVE

At the end of this workshop, the participants will develop comprehensive knowledge on research methodology, appreciate its importance in nursing research and apply this knowledge while conducting research.

SPECIFIC OBJECTIVE

At the end of the workshop, the participants will be able to:

- describe the research process
- explain the various research design
- apply SPSS for statistical analysis
- gain insight into dissemination of research
- appreciate the importance of ethics in research
